DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 34-37, 39, 40 are rejected under 35 U.S.C. 102(b) as being anticipated by Norris et al. (5,748,042).

Regarding claims 1, 34, Norris et al. (Figs. 2/3) disclose an amplifier circuit comprising: a field effect transistor (22) read as a semiconductor devices having a control terminal (gate) and two conducting terminals (drain ad source) wherein the first and second conducting terminals coupled to a ground potential and the output (Vout) is coupled to the second conducting terminal (drain); an RF source (Vin) coupled to control terminal (gate) of semiconductor devices (22); and sub-harmonic network (21) can be read as a filter coupled to the second conducting terminal (drain).

Regarding claims 2-4, 35-37, wherein the RFin is capable of receiving different signals having different waveforms and the type of wave used is an intended use of the invention.

Regarding claims 5, 6, 39, 40, wherein semiconductor device is a field effect transistors (22). FET and MOSFET are considered the same.

Application/Control Number: 09/835,249

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 7, 8, 11, 19, 20, 41, 46 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chawla et al.

Regarding claims 7, 41, it is known in the art that field effect transistor and bipolar transistor can be used interchangeably.

Regarding claim 8, the type of transistor used is considered a matter of design choice in the absence of unexpected result.

Regarding claims 11, 46, Chawla et al. disclose the claimed invention except a second filter having connection as claimed. However, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide an additional filter since an additional filter would only enhance the circuit ie. filter out noise or filter out unwanted signals etc.

Regarding claims 19, 20, the output of a RF signal source is either fixed or varies depend on the circuit design and the intended use of the invention.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Khanh V. Nguyen whose telephone number is (703) 306-9058. The examiner can normally be reached from 8:00 AM-5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Pascal can be reached on (703) 308-4909. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9318 for regular communications and (703) 872-9319 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Customer Service at (703) 872-9317.
